About the Information Function

Function Overview

The Information function offers information on this software and on the server PC.

With the Information function, you can:
 Display software information
 Display base software and each plugin version
 Manage paid plugins
 Activate / deactivate paid plugins
 Confirm paid plugin license status
 Update paid plugins
 Display hardware information
 Display server PC hardware information

Selecting the Information Function

Click the [Information] button in the function selection area on the left of the screen to display the Information function screen.

1. Production Software

Displays the version of the base software of this software.

2. Plugin Information

Displays this software's plugin information. Paid plugins can also be managed from here.

Explanation of List Information

• Plugin Name

Indicates the name of a plugin.

License Status

This indicates the status of the license if the plugin is a paid plugin.

[-] will be displayed if the plugin is a free plugin.

License Update Date

Displays the date the license was updated.

Remain Days

Paid plugins with limited-time licenses will have their remaining number of days displayed.

[-] will be displayed if the plugin is a free plugin or if the plugin is a paid plugin with an unlimited-time license.

Current Version

Displays the version information of installed plugins.

Latest Version

Displays the newest version of a plugin.

This is only displayed when the server PC is connected to the internet.

Manage Paid Plugins

Manage paid plugins

On this screen, you can manage the licenses of paid plugins.

The items that can be managed are as follows:

- Start a free trial

If a paid plugin has a free trial function, you can start a free trial.

- Activate/deactivate a license

You can activate/deactivate the license of a paid plugin.

- Check the license status

You can check the license status of a paid plugin.

- Install/update plugin data

If a paid plugin requires separate execution data, you can install/update the data.

Preparations (member registration on PASS site)

In order to start a trial and perform the activation procedure, you will need the email address that you used for member registration on the Panasonic PASS site. If you have not registered as a member, please register as a member on the PASS site following the procedure below.

*The PC must be connected to the Internet.

- 1. Click the [Information] button in the function selection area on the left of the screen to display the Information function screen.
- 2. Click the [Software] tab at the top left of the Information function screen to display the software information screen.
- 3. Click the [License Management] button on the software information screen to display the license management screen.

4. Click the [Go to PASS website] button at the top right of the license management screen.

Starting the Free Trial

If a paid plugin has a free trial feature, you can use the plugin's functions for a set period of time when you start the trial. The period of use varies depending on the plugin.

Start the trial according to the procedure below.

*The PC must be connected to the Internet.

Approximately 2GB of data is to be downloaded, so it is recommended to perform the procedure in an environment with good connection status.

*You must first register as a member of the PASS site by following the instructions in "<u>Preparations (member registration</u> on PASS site)".

- 1. Click the [Information] button in the function selection area on the left of the screen to display the Information function screen.
- 2. Click the [Software] tab at the top left of the Information function screen to display the software information screen.
- 3. Click the [License Management] button on the software information screen to display the license management screen.

 If a plugin data download is required, the plugin data will be downloaded from the Internet. After the plugin data download is complete, the License Status will change to [In Trial] and the plugin functions will become available.

If the processing does not end successfully for some reason, the following error message is displayed in Operation Status.

·Error - Unable to communicate with server

Communication with the activation server is not established.

Check if the PC is connected to the Internet.

·Error - Email address is not registered on the Pass site

The process cannot be completed because the email address you entered in the Email Address field in step 4 was not the one you used to register as a member on the PASS site.

Please enter the email address you used to register as a member on the PASS site.

Activating the License

To activate a paid license, follow the steps below.

*The PC must be connected to the Internet.

Approximately 2GB of data is to be downloaded if free trial is not performed, so it is recommended to perform the

procedure in an environment with good connection status.

*You must first register as a member of the PASS site by following the instructions in "<u>Preparations (member registration</u> on PASS site)".

- 1. Click the [Information] button in the function selection area on the left of the screen to display the Information function screen.
- 2. Click the [Software] tab at the top left of the Information function screen to display the software information screen.
- 3. Click the [License Management] button on the software information screen to display the license management

screen.

4. Enter the following information on the license management screen.

Host Name: Enter the PC name.

Email Address: Enter the email address you used to register as a member on the PASS site.

Organization: Enter the company name.

Country: Select the country.

- 5. Enter the key code of the purchased license in the Key Code field of [License Activation].
- 6. Click the [Activate] button.

7. Processing will start to activate the license.

If a plugin data download is required and you are not running a free trial, the plugin data will be downloaded from the Internet.

If the process is completed successfully, the License Status will change to [Activated] and the plugin will be available for use.

If the processing does not end successfully for some reason, any of the following error messages is displayed in Operation Status.

·Error - Keycode is already used

The key code you have entered is already activated on another PC.

To use the key code, you must deactivate the license on the PC on which the key code is used.

·Error - Invalid keycode

The key code you have entered is incorrect.

Check if the entered key code is correct.

·Error - Unable to communicate with server

Communication with the activation server is not established.

Check if the PC is connected to the Internet.

·Error - Email address is not registered on the Pass site

The process cannot be completed because the email address you entered in the Email Address field in step 4 was not used to register as a member on the PASS site.

Please enter the email address you used to register as a member on the PASS site.

Deactivating the License

If you wish to transfer a license to another PC, you must first deactivate the license on the PC on which the license is currently activated.

Deactivation is performed according to the following procedure.

*The PC must be connected to the Internet.

1. Perform steps 1 to 3 of "Activating the License" to display the license management screen.

	Plugin License Operation											
Ì	License A	Activation				User Info.

]	Deactivate Start Tria							Close			

- 2. Tick the checkbox at the left end of the row for Advanced Auto Framing that you want to deactivate.
- 3. Click the [Deactivate] button at the bottom of the license management screen.
- 4. Processing will start to deactivate the license. When the process completes successfully, the License Status will change to [Deactivated].

It takes a maximum of 1 minute for the request to be processed and reflected.

If the processing does not end successfully for some reason, the following error message is displayed in Operation Status.

·Error - Unable to communicate with server

Communication with the activation server is not established.

Check if the PC is connected to the Internet.

Apply for a license extension

If your license has a validity period, you can extend the validity period by carrying out the extension procedure using a different license (key code).

example)

- Extend an AW-SF501WZ (validity period: 7 days) by using another AW-SF501WZ (validity period: 7 days) The validity period will be 14 days (7 days + 7 days).
- Extend an AW-SF501WZ (validity period: 7 days) by using AW-SF501MZ (validity period: 30 days)
 - The validity period will be 37 days (7 days + 30 days).

You must apply for an extension on our PASS website.

Connect your PC to the Internet and follow the steps below to apply.

Please note that the extension procedure cannot be cancelled once completed.

- 1. Access the PASS site by following steps 1 to 4 in "Preparation (PASS site membership registration)".
- 2. Enter your email address and password in the email address and password input fields on the left side of the PASS site screen, then click the "LOG IN" button to log in to the PASS site.
