II Plug-in Version confirmation / Update procedure Page3-5

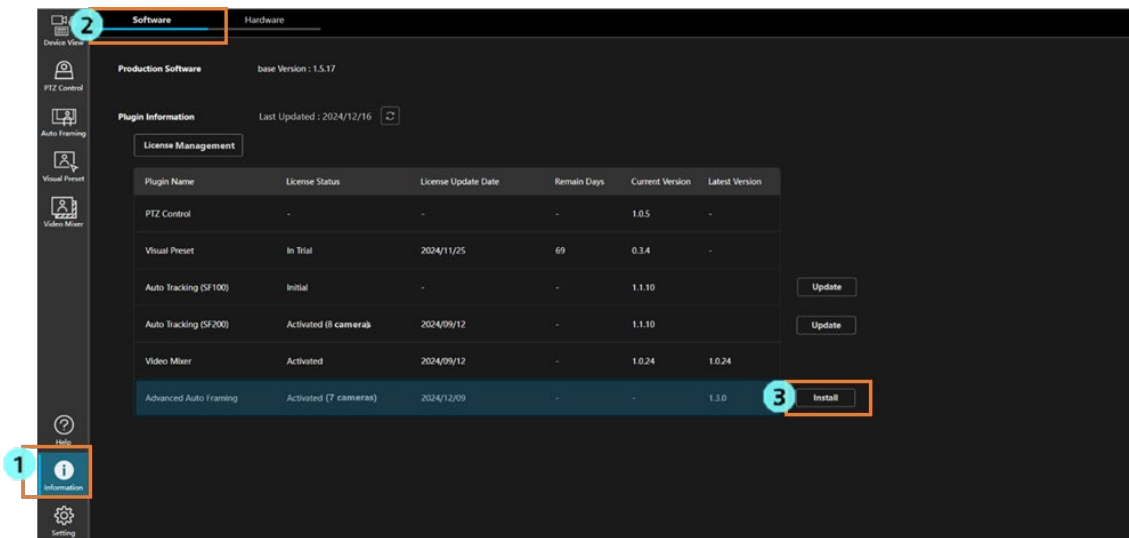

Media Production Suite Plug-in Function

To update the plug-in data or uninstall an activated app, the required latest plug-in data can be manually installed by following the steps below.

Please make sure the PC for updating is connected to the Internet.

I . Plug-in data Manual download / Install Procedure

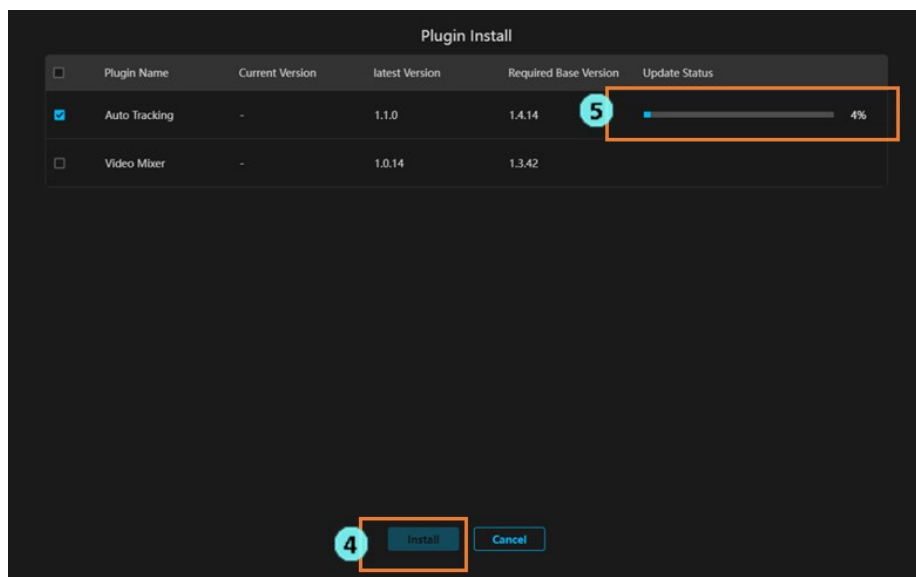

1. Open the Information function screen and click the [Install] button.①②③

2. The dialog box will display the plugins that can be downloaded.

Check the box next to the plugin you want to download and click the [Install] button.

④

3. If the download has started successfully, a progress bar will show the download progress.

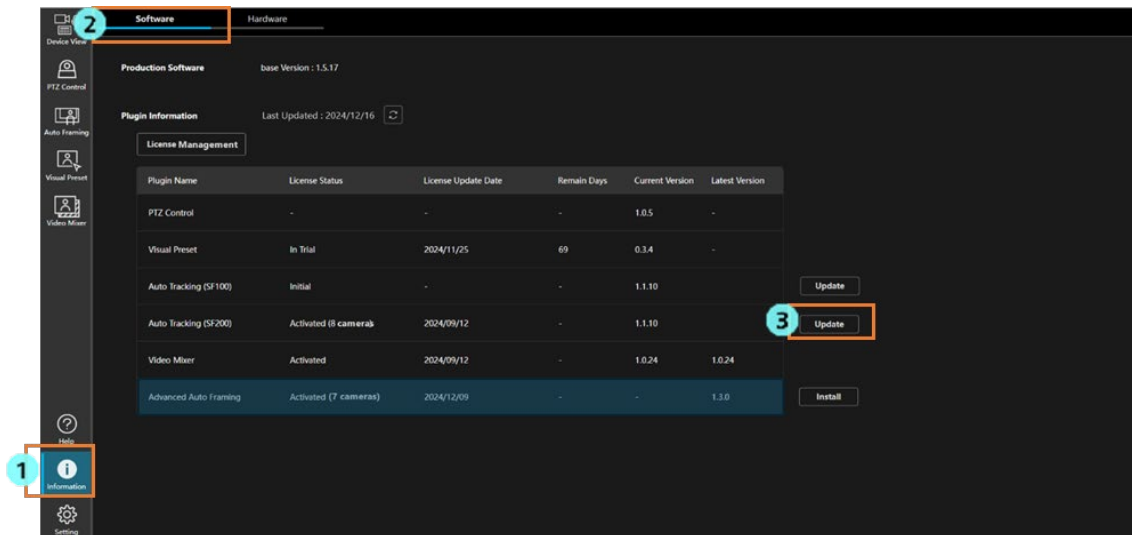

4. When the download is complete, the dialog will disappear and the plug-in will start.

If the plug-in has started successfully, the plug-in's function icon will be displayed on the left side of the screen.

II. Plug-in Version confirmation / Update procedure

1. Opens the Information function screen.

2. Check the [Latest Version] display in the list of each plugin. If a newer version than the one installed on your PC is available on the web, the color of the [Latest Version] column will change.

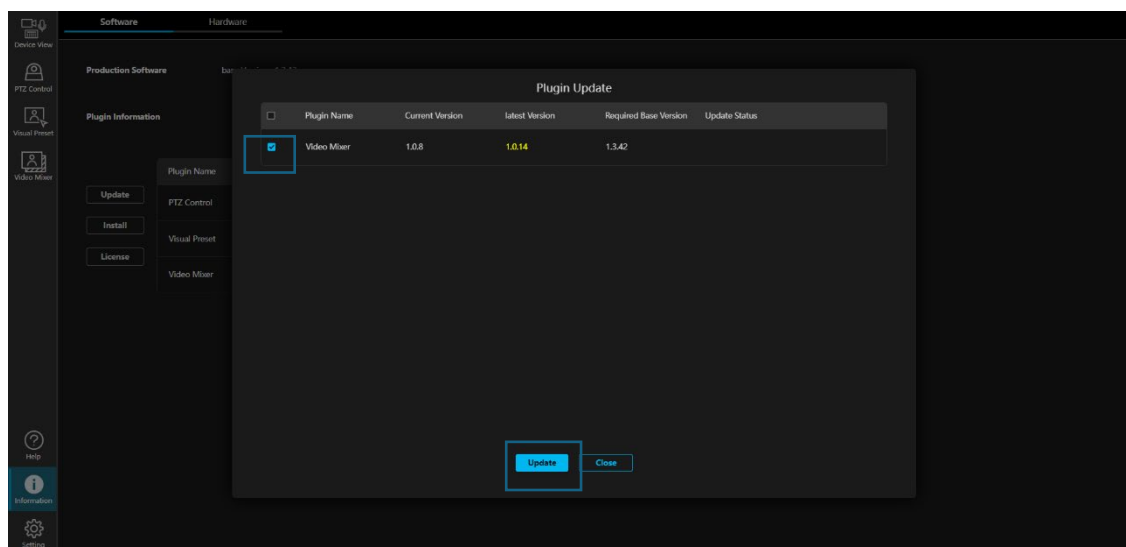

This close-up screenshot shows the 'License Management' table with the 'Latest Version' column for the 'Video Mixer' row highlighted in yellow, indicating that a newer version is available. The table also shows 'Update', 'Install', and 'License' buttons on the left side.

Plugin Name	License Status	License Update Date	Remain Days	Current Version	Latest Version
PTZ Control	-	-	-	1.0.5	-
Visual Preset	Deactivated	2024/05/17	-	-	-
Video Mixer	Activated	2024/05/17	-	1.0.0	1.0.2

3. Click the [Update] button.

4. The dialog will show plugins that can be updated.
Check the plugin you want to update and click the [Update] button.

5. If the download has started successfully, a progress bar will show the download progress.

6. When the download is complete, the dialog will disappear and the plug-in will start.

If the plug-in has started successfully, the plug-in's function icon will be displayed on the left side of the screen.
