Select “**Enable**” in the REC during upload menu.

Select “**REC CLIP (Proxy)**” in the Auto Upload menu.

**Step7.** Confirm the wireless connection (See page-8)  
and the ftp setting

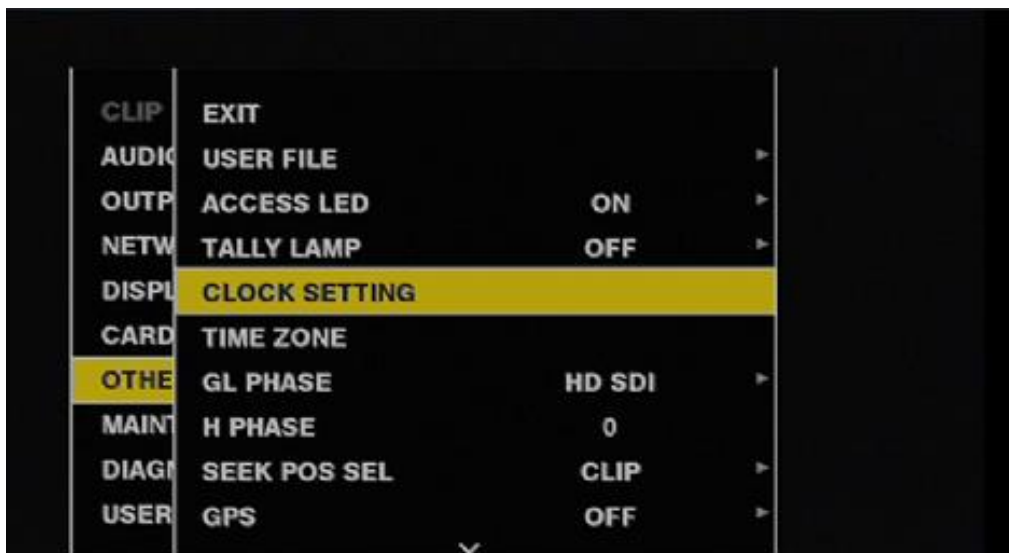

# Step1. Firmware version & Clock setting confirmation

How to confirm firmware version:  
MENU> DIAGNOSTIC

When registering P2 devices in P2 Cast, this NETWORK ID is necessary.

How to confirm clock setting:  
MENU> OTHER FUNCTIONS> CLOCK SETTING

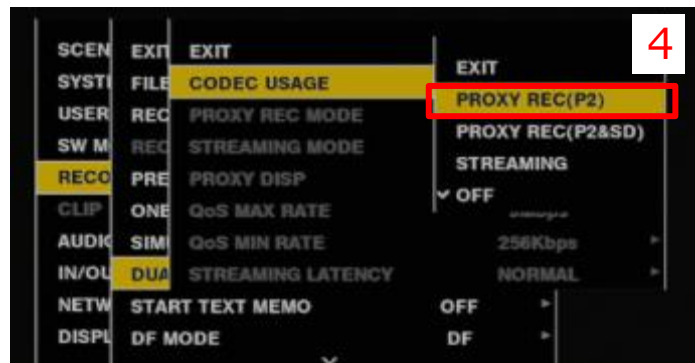

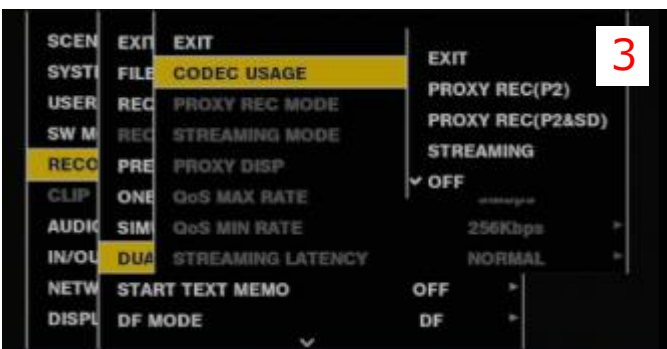

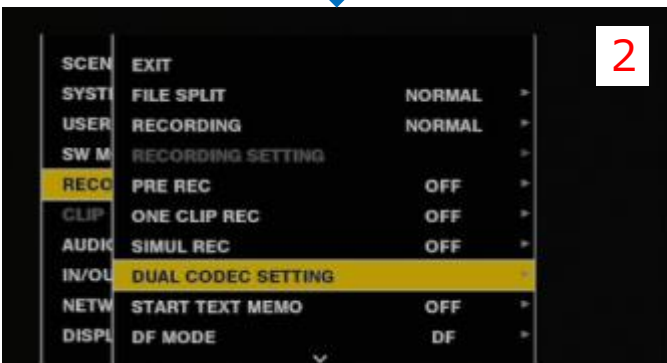

**\*When clock is not set properly, Highlight editing function and device status function won't work.**

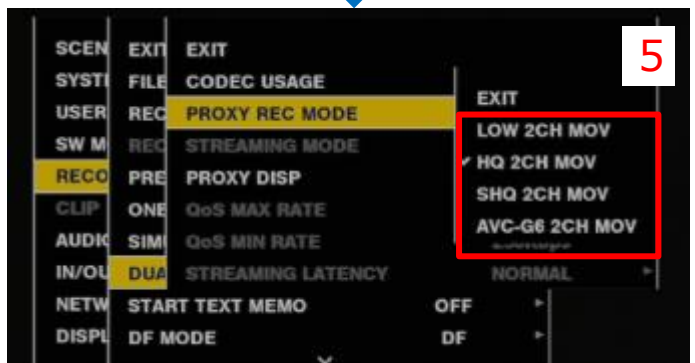

# Step2. Set “Dual Codec Setting”

How to set Dual Codec Setting:

MENU > RECORDING SETUP > DUAL CODEC SETTING > CODEC USAGE  
> PROXY REC (P2) > Either proxy format is compatible with P2 Cast

Select “PROXY REC (P2) in CODEC USAGE

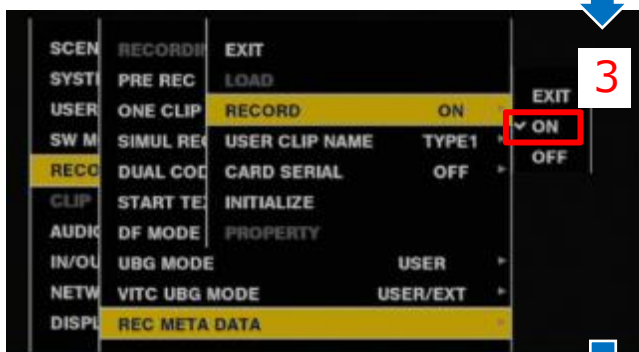

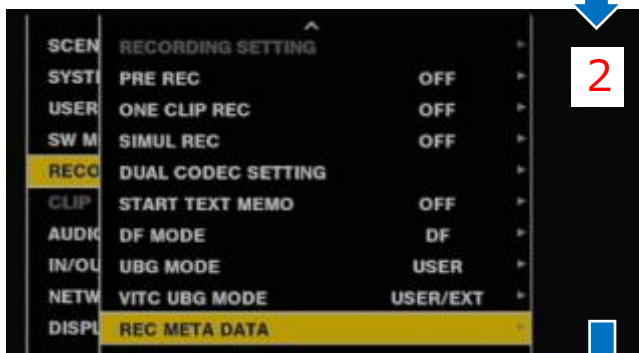

Select one of the codecs in PROXY REC MODE

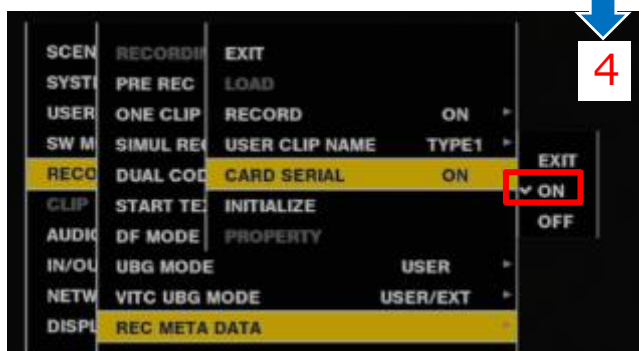

# Step3. Set "Rec Meta Data"

How to set Dual Codec Setting:

MENU > RECORDING SETUP> REC META DATA > RECORD ON  
> CARD SERIAL ON

Select "ON" in RECORD item

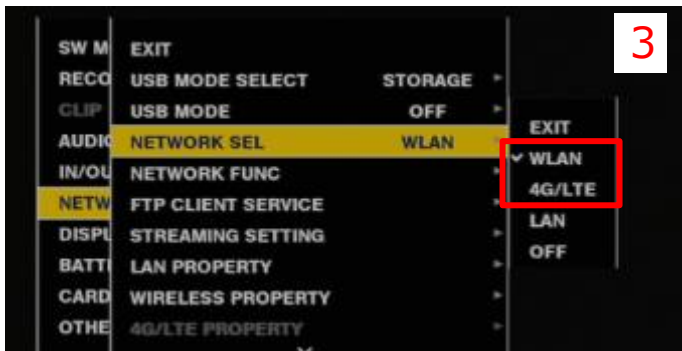

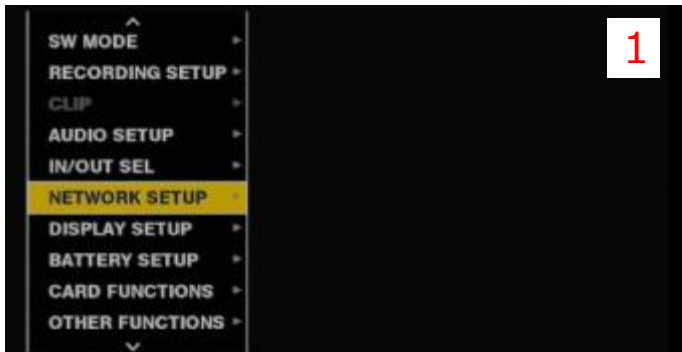

Select "ON" in CARD SERIAL item

# Step4. Set “NETWORK SEL”

How to set Network setting:

MENU > NETWORK SETUP> NETWORK SEL >WLAN or 4G LTE.

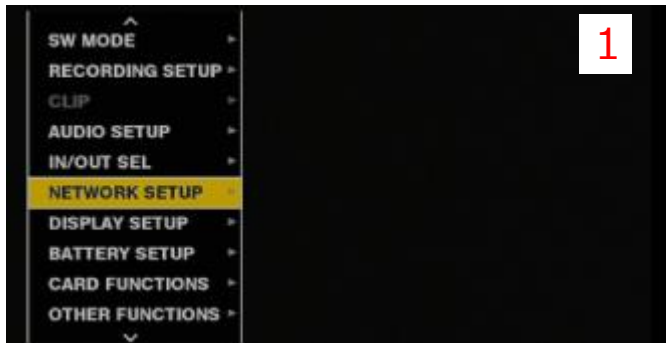

Select “WLAN” or “LAN” in NETWORK SEL item.

# Step5. Set "Wireless Property"

How to set Wireless property setting:

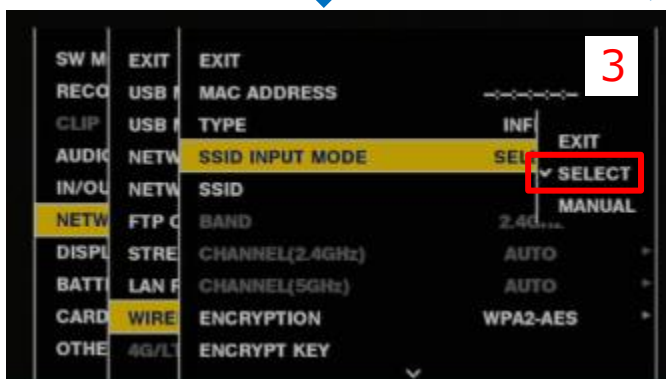

MENU > NETWORK SETUP > WIRELESS PROPERTY > TYPE > INFRA  
>SSID INPUT MODE > SELECT SSID  
>INPUT ENCRYPT KEY

Select an "access point" to be connected.

Select "ENCRYPT KEY"

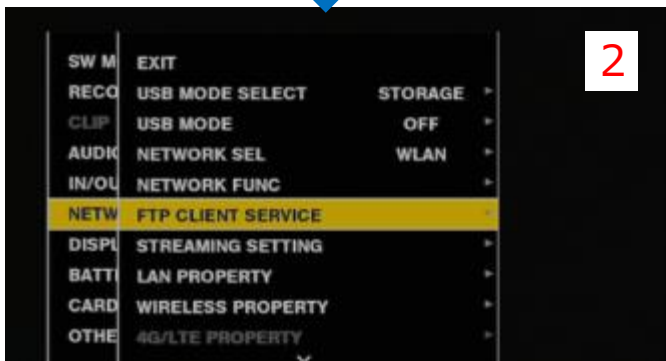

Enter the "ENCRYPT KEY" of the access point.

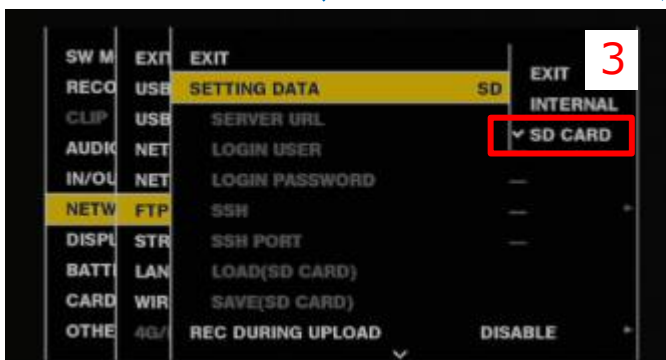

# Step6. Set "Ftp Client Service"

How to set Wireless property setting:

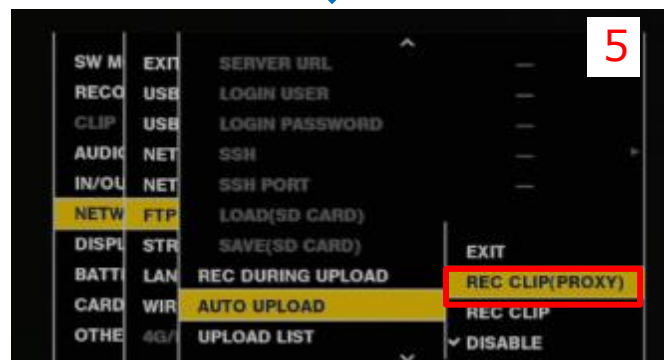

MENU > NETWORK SETUP > FTP CLIENT SERVICE > SETTING DATA > SD CARD  
>REC DURING UPLOAD> ENABLE  
>AUTO UPLOAD> REC CLIP(PROXY)

Select "ENABLE" in REC DURING UPLOAD item

Select "SD CARD" in SETTING DATA item.

Select "REC CLIP (PROXY)" in AUTO UPLOAD item.

# Step7. Confirm the wireless and the ftp setting”

Please confirm the thumbnail screen so that the wireless and the ftp setting has been done.

If “Enable” is set in the REC during upload menu  
This icon will appear.  
When uploading clips to P2 Cast, it becomes yellow.

If it becomes yellow,  
there is wireless connection.

After finish uploading  
proxy video,  
this icon will appear.

Proxy video transfer  
in progress.
