Controlling Focus of AW-HE40 Camera Manually

(Setting Procedure via AW-RP50)

<How to manually adjust the focus of AW-HE40 connected to CAM1>

① Press the button 1 at <CAMERA STATUS/SELECTION>. - (Fig. 1-A)

② Press "FOCUS AUTO" button (*1) on the front panel to switch between Auto and Manual. - (Fig. 1-B)

　(*1) When this button's light is ON, it indicates Auto Focus.　When it is OFF, it indicates Manual Focus and the focus can be adjusted using FOCUS dial. - (Fig. 1-C)

Also, changing the following camera menu setting enables you to manually adjust the focus.

③ Hold down CAMERA OSD button at the upper right of the panel so that the on-screen menu is displayed. - (Fig. 1-D)

　　* If CAMERA OSD button is held down again, the on-screen menu will disappear and the button's light will go off.
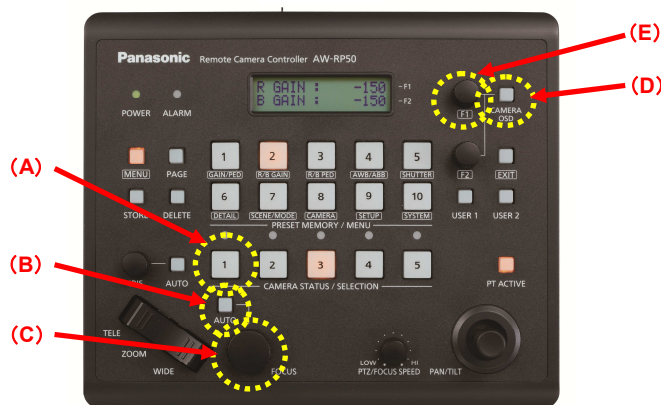

④ Use F1 dial to change the following camera menu setting. - (Fig. 1-E)

　　【Location】

　　　・ System ＞ Others ＞ Other1/4 ＞ Focus Mode ⇒ Put the setting to [Manual] (*2).

　　　　　　　　　　　(*2) This setting is linked with the setting for the above "FOCUS AUTO" button (Step ②).
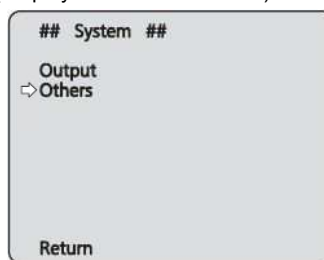

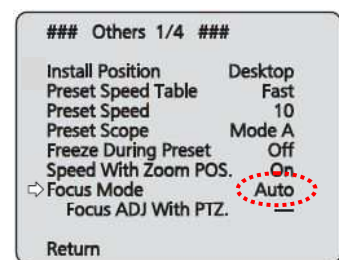

(Figure 1)

(Displayed On-Screen Menu)

Turn F1 → Select "System" → Press F1

Turn F1 → Select "Others" → Press F1

Turn F1 → Select "Focus Mode"

Press F1 → [Auto] Blinks

Turn F1 → Select [Manual]

Press F1 → Setting Determined

(Setting Procedure via Web Screen on PC)

- Start up the Web screen to change the following setting.

【Location】

① Press [Auto] button (*3) at "Focus" to switch between Auto Focus and Manual Focus. - (Fig. 2-A)

(*3) When this button's light is ON in green, it indicates Auto Focus. When it is OFF, it indicates Manual Focus.

② Adjust the focus using [Near] and [Far] buttons at "Focus". - (Fig.2-A)

* If [O. T. AF] button is pressed while the setting is at Manual Focus, focus adjustment is temporarily performed by Auto Focus.

* For the connection between PC and AW-HE40, please refer to the Manual 【Controlling AW-HE40 Camera via PC】.

(Figure 2: Web Screen)

★ When Focus Mode is [Manual], the setting for "Focus ADJ With PTZ" (*4) can be changed.

(*4) What is "Focus ADJ With PTZ"?

It is a function to automatically readjust the focus while panning, tilting or zooming.

If you need full manual control of focus, please have this setting at [Off].   * Default: [Off]

【Location】

(Camera Menu)

・ System ＞ Others ＞ Other1/4 ＞ Focus ADJ With PTZ ⇒ [Off]

(Web Screen)

・ Setup ＞ Image/Audio ＞ Image/Position ＞ Preset position ＞ Focus ADJ With PTZ ⇒ [Off]
